## Geodetics and ITT Exelis Announce New SAASM RTK Solutions

SAN DIEGO, CA., July 9, 2012 – Geodetics Inc., in cooperation with Exelis (NYSE: XLS) has announced the availability of a new Selective Availability Anti-Spoofing Module (SAASM) high-accuracy Real-Time Kinematic (RTK) Global Positioning System (GPS) capability. The new capability is based on a collaborative effort between the two companies.

It incorporates proven RTK technologies and products from Geodetics integrated with the high precision and GPS security features of the Exelis SAASM.

The new Geodetics / Exelis offerings provide high-accuracy GPS capabilities using the military Precise Position Service (PPS) Y-code on both L1 and L2. The Exelis SAASM produces pseudorange and integrated carrier phase observables at a selectable output rate. These observables are fully integrated into Geodetics' high-accuracy GPS technologies and is compatible with a full line of turn-key positioning and navigation products including inertial navigation (GPS/INS) and relative navigation systems, GPS-based attitude determination, GPS reference network / survey and post-processing tools.

The result is an industry leading, cost-effective SAASM capability, integrated with a proven solution suite designed to support a wide range of positioning and navigation applications for manned and unmanned air, sea and ground vehicles.

"Geodetics is delighted to be working with Exelis. Our collaboration provides the authorized military user with turn-key solutions providing unprecedented centimeter-level position accuracy with full SAASM compliance" said Dr. Lydia Bock, Geodetics President and CEO.

### **About Geodetics Inc.**

Geodetics Inc. is a leader in high-accuracy, real-time GPS solutions. The company was founded 1999, and is privately held with headquarters in San Diego, California. Geodetics Inc. develops and markets real-time, high-precision positioning and navigation hardware and software solutions for military and civilian applications requiring the highest levels of precision: [www.geodetics.com](http://www.geodetics.com)

### **About ITT Exelis**

ITT Exelis is a diversified, top-tier global aerospace, defense and information solutions company with strong positions in enduring and emerging global markets. Exelis is a leader in networked communications, sensing and surveillance, electronic warfare, navigation, air traffic solutions and information systems with growing positions in cyber security, composite aerostructures, logistics and technical services. The company has a 50-year legacy of innovation and technology expertise, partnering with customers logistics and technical services. The company has a 50-year legacy of innovation and technology expertise, partnering with customers worldwide to deliver affordable, mission-critical products and

services for managing global threats, conflicts and complexities. Headquartered in McLean, Va., the company employs about 20,500 people and generated 2011 sales of \$5.8 billion. [www.exelisinc.com](http://www.exelisinc.com)
